

I have a question

I can describe my research question clearly

I have background, information about data source(s) & key references

I am excited to discuss!

How to work with a statistician

My data

Understanding the data: available information, potential biases, limitations, missingness

68.02	50	-55	-55
100.92	113	117	119
76.25	45	50	-52.5
76.60	40	45	-47.5

Data storage and access?

Are the data appropriate for the research question?

Marianne Huebner

What do I need from a statistician

What are my expectations?
Desired deliverables?

Agree on feasible timelines ✓

Discuss requirements, roles, attribution ✓

Submitted manuscript/abstract/grant proposal/dissertation

Strong collaborative relationships

Empowered with new ideas
Choices based on sound statistical ideas ✓

Success for all!

My responsibilities

Involve a statistician early!

Define clear research aims and objectives

Be open to ideas

Get ethics approval

Provide quality data and explain their background

Communicate in a timely manner

Communicates in a timely manner
Checks data quality, performs data analysis, checks validity

Provides accurate guidance on study design and methods.
Explains clearly

Adheres to ethical guidelines for statistical practices
Learns about the background
responsibilities
Statistician's
